Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's amendment filed on December 28, 2004 has been entered. No claims have been amended. No claims have been cancelled. No claims have been added. Claims 1-22 are still pending in this application, with claims 1, 6, 10, 15 and 19 being independent.

### ***Claim Rejections - 35 USC § 103***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-22 rejected under 35 U.S.C. 103(a) as being unpatentable over Valentine (US 6,157,640) in view of McMahan et al. (US 5,402,477), as per the same reasons set forth in the Office Action mailed on 8/19/2004; hereby incorporated by reference.

### ***Response to Arguments***

4. Applicant's arguments filed on December 28, 2004 have been fully considered but they are not persuasive.

Applicant argues that their claimed "call state monitor" passively determines a device call state and that in contrast "control node 200" of Valentine is an active device. The Examiner deemed the argument irrelevant as such feature is not part of the claimed limitations. Further, Applicant argues that Valentine's "control node 200" is "not for detection of call state". The Examiner respectfully disagrees and directs the Applicant to

Col. 8, lines 7-8. Valentine clearly discloses that the control node determines that the smart telephone (or device) is already in speech connection (or call state).

In addition, Applicant argues that McMahan et al. "does not contemplate telephony documentation". The Examiner respectfully disagrees, the "telephony documentation" limitation reads on Col. 7, the "list of offerable services" is indeed a list of "telephony documentation".

The argument regarding "update to the list of telephone documentation" reads into the feature taught by McMahan et al. in Col. 7, lines 34-42, by determining whether a service is supported by the connection and switch environment, the system is "updating" the list of telephone documentation that can be handled by the system.

### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
